Appendix 2: Module descriptions

B.A. Business Administration (Work-Integrated)

	Principles of Business Administration								
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	150 h	6	1st sem.	Annual	Winter	1 sem.	Compulsory	B.A.	
1	Course type		Contact time	Self-study		_	Planned group size	Language	
	Sem. lessons		4 SCH/60 h	90 h	Lecture, studies, ex		35	German	

2 Learning outcomes/competences

On successful completion of the module, students have the following knowledge and skills:

- They are able to explain the basic terms and objects of knowledge of General Business Administration.
- They are able to define central business issues and approaches to finding solutions in performance management, finance and supporting management functions.
- They are able to utilise the first holistic understanding of businesses and companies that they acquire.
- They are able to apply what they have learned to specific practical examples.

3 Contents

- Introduction to the professional field
- Introduction to economic thinking
 - Business goals: economic, ecological and social goals
 - Sustainability as a corporate management concept
 - The economic principle
 - Business administration as a science
- Production and Logistics
 - Principles of production
 - Forms of production
- Corporate taxation and corporate audit
 - Legal forms
 - Taxation and Audit (including tax liability and tax compliance)
 - Taxation and Audit
- Human resources management and business organisation
 - Leadership styles and motivational tools
 - Structural organisation and workflow management
- Finance, accounting and controlling
 - Investment calculation method
 - Forms of financing and types of contracts
- Marketing
 - Principles of Marketing
 - Marketing tools

	External Accounting								
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	150 h	6	1st sem.	Annual	Winter	1 sem.	Compulsory	B.A.	
1	Course type		Contact time	Self-study	Forms of te (learning m		Planned group size	Language	
	Sem. lessons		4 SCH/60 h	90 h	Lecture, exe case stu	,	35	German	

After successfully completing this module, students are able to:

- understand and evaluate the principles and relationships of double-entry bookkeeping in business administration.
- explain components of financial statements,
- discuss accounting techniques while taking into account the applicable legal provisions and apply the principles of accounting,
- develop accounting records for a wide variety of real situations and thus perform bookkeeping for the most important functional areas in companies,
- draw up basic annual financial statements depending on the legal form and in accordance with commercial law and international accounting,
- analyse, interpret and evaluate the components of annual financial statements,
- explain the need to comply with legal requirements and assess the consequences of breaches.

All learning outcomes are based, amongst other things, on the familiarity in dealing with the current legal standards for accounting, generally those set by the commercial law (HGB – Handelsgesetzbuch – German Commercial Code), and in selected cases the International Financial Reporting Standards (IFRS).

3 Contents

- 1. Introduction to Business Accounting
 - Tasks and structure of business accounting (including the economic purpose of accounting)
 - Basic accounting terms
 - Components of the accounting system (balance sheet, income statement, appendix, management report incl. sustainability reporting)
 - Organisations and legal regulations for preparation and disclosure (obligations and consequences of non-compliance)
- 2. Introduction to accounting techniques
 - Central elements of external accounting
 - Business transactions that do not affect profit or loss
- 3. Entries in important areas of the company
 - Procurement (goods and capital goods)
 - Production
 - Sales
 - Human resources
- 4. Preparation of annual financial statements
 - Individual questions of evaluation according to commercial law
 - Definition
 - Legal form-dependent preparation of annual financial statements and allocation of profits
 - Principles of international accounting according to the IFRS definition
 - Legal form-dependent preparation of annual financial statements and allocation of profits
 - Principles of international accounting according to the IFRS

Communication and Management Skills								Module ID 5 MG 81
No.	Workload	Credit points	Study semester	Frequency	Sem.	Q-level		
	150 h	6	1st sem.	Annual	Winter	1 sem.	Compulsory	B.A.
1	1 Course type		Contact time	Self-study	Forms of tea (learning me		Planned group size	Language
	Sem. lessons		4 SCH/60 h	90 h	Lecture, group exercise		25	German

On successful completion of the module, students have the following knowledge and skills:

- They are proficient in presentation and moderation techniques, as well as goal and time management methods, and are able to implement them in a presentation.
- They are able to research materials and information on an economically relevant topic, understand it, and create a content structure.
- They are able to prepare a written exposition.
- They are able to define creativity and moderation techniques and use them as part of the innovation management process.
- They are able to discuss essential communication models and techniques, as well as forms of interviews, and apply these in the context of interviews.
- They are able to describe conflict types and levels and hold discussions to resolve the conflict.

3 Contents

Communication skills:

- Goal, time and self-management
- Presentation and moderation techniques
- Analysis and application of communication models and techniques

Management skills:

- Innovation management (especially in new product planning)
- Requirements and forms of interviewing
- Conflict types and levels, as well as instruments for conflict resolution

Principles of scientific work (research, structure, citing).

4 Participation requirements

None

Form of assessment

Written examination; the prerequisite for participation in the written examination is a pass in an ungraded preliminary examination in the form of a presentation

6 Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (work-integrated) (B.A.)

8 Module coordinator

Prof. Dr. Kerstin Stender-Monhemius

	Work-Related Module I								
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	75 h	3	1st sem.	Annual	Winter	1 sem.	Compulsory	B.A.	
1	Course type		Contact time	Self-study	Forms of tea (learning me	_	Planned group size	Language	
	Inte	rnship	-	75 h					

Students are able to apply the theoretical knowledge acquired during the course of their studies in operational practice.

In addition, they are able to analyse and evaluate practical business management problems and ultimately derive recommendations for action, in which, in addition to business management aspects, ethical and social issues are also taken into account.

Students are able to communicate and interact with other people (both supervisors and subordinates) in an adequate and business-like manner.

3 Contents

In the so-called "short" work-related module, students are introduced to the professional activities of a business manager through practical work in their company.

Based on the course outline dealt with in the previous academic terms, students should be confronted with the requirements of business practice. They are given the opportunity to make observations and gain practical experience and, where applicable, are given scope for their own decision-making.

Instruction in practical work is provided by an in-company supervisor, with the support of academic teachers if necessary.

The internship includes the following central elements:

- Agreement on the terms of the internship and preparatory discussions with the incompany supervisor
- b) Accompaniment of the internship by an in-company supervisor and needs-oriented support by an academic teacher
- Evidence of practical activity through a tabular list of the activities carried out (proof of execution of the "short" work-related module).
- d) Final meeting with the in-company supervisor and feedback discussion

4 Participation requirements

Compulsory participation after the academic term of the first semester

Form of assessment

Certificate of successful participation (Section 18 (4) SPO – Studien- und Prüfungsordnung – Study and Examination Regulation), ungraded

6 Condition for the award of credit points

Submission of the proof of execution of practical work

7 Application of the module (in the following study programmes):

	Sem. le	essons	4 SCH/60 h	90 h	Lecture, case studies, exercises, group work		35	German

On successful completion of the module, students are able to

- present basic perspectives, tasks and solution approaches of leadership within the framework of corporate management,
- develop and implement an in-depth understanding of the networked interdisciplinary, organisational and social aspects of leadership,
- recognise complex situations in the context of human resources management and evaluate them appropriately on the basis of scientific findings,
- transfer the knowledge they have absorbed to commercial and service companies,
- critically discuss different management principles, leadership techniques, leadership styles and management tools and instruments that are applied or used in practice and apply them to practical examples,
- using the knowledge and skills acquired by analysing various management situations and presenting a picture of today's managers, their professional, methodological and social skills, and their importance for a company's success.

3 Contents

- Introduction to human resources management and leadership, importance in the context of corporate management
- Roles in the context of human resources management: managers, employees, HR department
- Tasks, skills and personality traits of managers
- A leader's ability to assert him-/herself: power, authority, charisma
- Corporate culture, leadership principles, ethics and compliance
- Conditional factors for human resources management such as job satisfaction, communication, motivation, division of labour, coordination and cooperation
- Images of people, generation-specific aspects
- Leadership styles
- Leadership theories and concepts
- Leadership techniques and models
- Management tools and instruments
- Leadership of groups and teams
- Social processes, group dynamics, conflict management
- Advising, qualifying and supporting managers concerning their tasks
- Measurement of leadership quality
- In-depth aspects human resources management and diversity, corporate social responsibility, digitalisation

4 Participation requirements

Basic knowledge of leadership behaviour, skills, tools and theories, as taught in e.g. module 5 MG 81 "Communication and Management Skills," is recommended.

Form of assessment

Written examination or oral examination or term paper or a combination of written examination and oral presentation or a combination of written examination and term paper

6 Condition for the award of credit points

	Financing & Investments											
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level				
	150 h	6	3rd sem.	Annual	Winter	1 sem.	Compulsory	B.A.				
1	Course type		Contact time	Self-study	Forms of teaching (learning methods)		Planned group size	Language				
	Sem. le	essons	4 SCH/60 h	90 h	Lecture, exer	cises	35	German				

On successful completion of the module, students are able to

- name and explain detailed terms in financing and investment,
- identify financial design options against the background of corporate and investment goals and classify them in the financial decision-making process,
- select and apply suitable concepts and procedures geared to the specific question of assessing an optimal form of financing or the profitability of an investment,
- assess financial decisions in practice with regard to their contribution to the
 achievement of goals and taking into account the risk appetite of the decision-maker
 and the information situation, and derive recommendations for management,
- deduce the legal consequences of a lack of liquidity.

3 Contents

Financing: Fundamental principles; tasks, principles and procedures of financial planning; different forms of the classic subdivision of the types of financing; determination and approaches for the optimisation of financing and capital structure; legal consequences of illiquidity (obligation to file for insolvency)

Investment: Understanding and types of investment decisions; tasks, principles and procedures of investment planning and calculation; dynamic investment calculation methods (including net present value, internal rate of return and annuity method); static methods of investment calculation (e.g. cost, profit, profitability and amortisation comparison calculation); determination of the optimal service life and resolution of the replacement problem.

4 Participation requirements

Basic knowledge of financing and investment, as taught in module 5 MG 82 "Principles of Business Administration" is recommended.

1	Course type		Contact time	Self-study	Forms of tea (learning me	_	Planned group size	Language			
	Inte	rnship	-	225 h							

Students are able to apply the theoretical knowledge acquired in the course of their studies to practical, project-oriented problems or issues.

In addition, they are able to analyse and assess specific problems from a business point of view and in accordance with the scientific working method, and to derive recommendations for action in which, in addition to business management aspects, ethical and social issues are also taken into account.

They are also able to document and present the procedure and results of their tasks in accordance with the technique of scientific work in the form of a term paper.

Finally, they are able to argue their opinion in the form of discussions with their in-company supervisor or other people.

3 Contents

In the so-called "long" work-related module, students have to work on specific projects/tasks in a business context. Individual problems should be examined and resolved holistically.

The procedure and results of the project/task are documented and graded according to the rules of the technique of scientific work.

The topics to be dealt with must be business-related and based on the module content of the curriculum.

The subject is approved by teaching staff at the suggestion of the student. The faculty tutor guides the students with the support of the in-company supervisor and oversees the course.

The internship includes the following central elements:

- a) Internship and preparatory conversation with the in-company supervisor
- b) Internship and preparatory conversations with the supervising professor
- Topic definition (based on proposals determined in preliminary discussions) by the supervising professor
- b) Accompaniment of the internship by the in-company supervisor and the professor
- d) Preparation of a term paper by students
- e) Final meeting with the in-company supervisor
- f) Grading and final interview with the supervising professor

On successful completion of the module, students have the following knowledge and skills:

- They are able to outline the structure of German tax law and the main roles involved.
- They are able to assess the necessity of tax liability and tax collection in order to finance the rule of law and discuss the main consequences of tax fraud or tax evasion.
- They are able to describe and apply the procedure for determining the tax burden of the various types of income tax.
- They are able to compare the procedure between the various types of income tax.
- They are able to outline significant deviations between commercial and tax law, assess their effects, and make accounting policy decisions.

3 Contents (amongst others):

Principles of taxation

- Overview of the tax system and main types of tax
- Basic principles of tax procedural law
- Goals/necessity of taxation: fiscal policy goals (use of funds for public expenditure, e.g. security, infrastructure, schools), distribution policy goals (social subsidies), as well as economic policy goals.
- Duties of the taxpayer, including consequences of incorrect behaviour

Income taxes

- Overview of the tax system and main types of tax
- Basic principles of tax procedural law
- Principles of income tax, e.g. personal and material tax liability, determination of the tax base, tax rate
- Principles of corporate income tax, e.g. personal and material tax liability, determination of the tax base, tax rate
- Trade tax: Material tax liability, determination of the tax base, tax determination and tax rate
- Taxation of business activities depending on the legal form

Law of tax accounts:

- Profit determination methods and areas of application
- Concept of tax accounts
- Accounting and valuation of essential assets
- Tax-free reserves
- Principles of tax accounting policy

On successful completion of the module, students have the following knowledge and skills:

- They are proficient in various options for the goal-oriented design of organisations.
- They are able to adequately assess current organisational development trends in practice on the basis of relevant organisational theories.
- They are able to explain goals, influencing factors and conditions of process organisation.
- They are able to identify business processes and optimise them with the aid of process management.
- They can explain permanent corporate change as an organisational challenge and are able to explain and apply fields of action, obstacles and instruments of change management.

3 Contents

Introduction:

- Organisational concept
- Basic organisational theory approaches and current development trends

Organisational structure:

- Task analysis and synthesis
- Structure and forms of organisation

Process organisation:

- Process management as a cross-departmental organisational concept
- · Process-oriented organisational design

Change management:

- Company change as a continuous process
- Fields of action, obstacles and concepts

Organisational implementation of CSR in companies

4 Participation requirements

- Students are able to define the essential terms, key figures and methods, as well as the necessary terminology, in the field of production and logistics.
- Students are able to apply the methods listed.
- Students are able to classify relationships in the field of logistics and production.

3 Contents

The most important components and processes of service provision are dealt with in more detail:

- Principles
- Definition and meaning of production and logistics
- Input factors
- Production and cost theory
- Production scheduling
- Products and product descriptions
- Concepts of production and logistics management

	Work-Related Module IV									
No.	Workload	Credit points	Study semester	Frequency	Sem.	Durat- ion	Туре	Q-level		
	75 h	3	4th sem.	Annual	Summer	1 sem.	Compulsory	B.A.		
1	1 Course type		Contact time	Self-study	Forms of te		Planned group size	Language		
	Internship		-	75 h						

Students are able to apply the theoretical knowledge acquired during the course of their studies in operational practice.

In addition, they are able to analyse and evaluate practical business management problems and ultimately derive recommendations for action, in which, in addition to business management aspects, ethical and social issues are also taken into account.

Students are able to communicate and interact with other people (both supervisors and subordinates) in an adequate and business-like manner.

3 Contents

In the so-called "short" work-related module, students are introduced to the professional activities of a business manager through practical work in their company.

Based on the course outline dealt with in the previous academic terms, students should be confronted with the requirements of business practice. They are given the opportunity to make observations and gain practical experience and, where applicable, are given scope for their own decision-making.

Instruction in practical work is provided by an in-company supervisor, with the support of academic teachers if necessary.

The internship includes the following central elements:

- Agreement on the terms of the internship and preparatory discussions with the incompany supervisor
- b) Accompaniment of the internship by an in-company supervisor and needs-oriented support by an academic teacher
- Evidence of practical activity through a tabular list of the activities carried out (proof of execution of the "short" work-related module).
- d) Final meeting with the in-company supervisor and feedback discussion

4 Participation requirements

Compulsory participation after the academic term of the fourth semester

5 Form of assessment

Certificate of successful participation (Section 18 (4) SPO – Studien- und Prüfungsordnung – Study and Examination Regulation), ungraded

6 Condition for the award of credit points

Submission of the proof of execution of practical work

7 Application of the module (in the following study programmes):

8	Module coordinator
	Prof. Dr. Andreas Stute
9	Other information

Macroeconomics and Economic Policy									
No.	D. Workload Credit Study points semester Frequency Sem. Duration Type							Q-level	
	150 h	6	5th sem.	Annual	Winter	1 sem.	Compulsory	B.A.	
1	Course type		Contact time	Self-study	Forms of te		Planned group size	Language	
Sem. lessons		4 SCH/60 h	90 h	Lecture, exe project w	•	35	German		

On successful completion of the module, students have the following knowledge and skills:

- They are able to outline basic macroeconomic analysis tools.
- They are able to explain concepts of national accounts.
- They are able to formally and graphically derive macroeconomic equilibrium conditions on goods and financial markets.
- They are able to quantify the effects of state economic policy.
- They are able to analyse and assess the macroeconomic effects of monetary policy measures of major central banks.
- They are able to independently assess macroeconomic issues in labour market policy and foreign trade, show the advantages and disadvantages of competing approaches, and assert their own position in group discussions.

3 Contents

- Microeconomic thinking and macroeconomic models
- National accounts and analysis of macroeconomic indicators
- Macroeconomic modelling of the market for goods
- Money and financial markets from a macroeconomic perspective
- Labour markets from a macroeconomic perspective
- IS-LM ("investment-saving" (IS) and "liquidity preference-money supply") model of the closed economy
- IS-LM model of the open economy
- Fiscal and monetary policy in IS-LM models
- Wage rigidities, inflation, unemployment and the Phillips curve
- Current problems in international trade from a macroeconomic perspective

	Lecture Exercise		2 SCH/30 h 2 SCH/30 h	90 h	Lectur Exercis	_	60 20	German			

After successful completion of the module, students are able to:

- explain elementary concepts and terms of business information systems in their own words,
- present application scenarios with the support of modelling formalisms,
- assess the security risks associated with the use of information technology,
- assess the opportunities and risks of the Internet and present the resulting added value opportunities in the area of e-commerce,
- resolve selected business tasks with the support of relational database systems and spreadsheets,
- explain the social effects of digitisation and name aspects of the rule-compliant use of information technology.

3 Contents

Students acquire the listed competences and skills by dealing with the following topics and contents:

- 1. Business process optimisation
 - Essence of business processes
 - Business processes and IT
 - Business process models
 - Basic concepts of business process optimisation
- 2. Security in Information Technology
 - Economic, social and organisational aspects
 - Basic security measures
 - Selected attack scenarios
 - Data encryption on the Internet
 - Digital signatures
- 3. IT infrastructure
 - Basic knowledge of hardware
 - Basic knowledge of operating systems
 - Basic knowledge of networks and protocols
- 4. Data organisation and data management
 - · Tasks and functions of a database
 - Data modelling, esp. ER (entity-relationship) model
 - Relational data model and SQL (Structured Query Language)
 - Data warehouse concept
 - Possibilities and limits of business intelligence and big data
- 5. Internet and e-Commerce
 - Overview of the Internet
 - Architecture and function of a web application
 - E-commerce processes and systems

	Sem. lessons		4 SCH/60 h	90 h	Group	work	25-30	German		

On successful completion of the module, students have the following knowledge and skills:

- They are able to holistically live and recognise business relationships.
- They are able to define and pursue strategies, goals and concrete measures to ensure the competitiveness of a company in a dynamic environment.
- They understand business figures and can implement them in practical decisions.
- They are able to deal with complex decisions under conditions of uncertainty.
- They are able to organise decision-making in the team in a time-efficient manner.
- They are proficient in cross-functional thinking and acting.
- They are able to solve problems in a structured way.

3 Contents

Conduct of a computer-aided simulation game with extensive management-level decision-making tests on issues such as product and market development, environment analyses, competitive intelligence, leadership, production management, financing, investment and accounting. The students will work on sustainable decisions in the aforementioned subject areas, which will then be processed and analysed in the simulation.

4 Participation requirements

Basic knowledge of general business administration and knowledge of investment/finance, accounting, sales and production at bachelor's level, as imparted in the bachelor's programmes Business Administration, Business Information Systems, Business Law and Business Psychology.

5 Form of assessment

Combination of project work (assessment of the simulation performance) and written examination or combination of project work and oral examination

6 Condition for the award of credit points

Regular attendance and module examination pass

7 Application of the module (in the following study programmes):
To consolidate business administration knowledge in the bachelor's programmes Business Administration (B.A.) and Business Law (LL.B.)

After successful completion of the module, students are able to:

- describe the forms and advantages of integrated systems,
- describe the essential master and transactional data of an ERP system and explain it using examples,
- describe the essential functions of an ERP system and explain them using examples,
- execute selected functions and processes on a SAP system,
- · describe the implementation process of an ERP system,
- perform basic operation on a SAP system,
- carry out case studies in groups and alone on the ERP system,
- · describe simple processes and demonstrate them on the ERP system,
- argue in a factual manner in small groups and recognise and perceive their own roles in small groups.

Contents

Students acquire the listed competences and skills by dealing with the following topics:

- Understanding the company's logistic and monetary processes which are mirrored in an information layer
- Basic knowledge of ERP systems (goal, conception, problems)
- · Structuring of ERP systems
- Organisational structures
- Essential master data
- Essential functions
- Forms of integration
- Integrated data processing concepts:
 - Process orientation
 - Redundancy reduction
 - Duality of real economic and informational processes
- Introduction of ERP systems

4 Participation requirements

None; basic knowledge of accounting and business information systems is recommended

5 Form of assessment

Written examination or oral examination

6 Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (work-integrated) (B.A.)

8 Module coordinator

	Work-Related Module VI									
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level		
	225 h	9	6th sem.	Annual	Summer	1 sem.	Compulsory	B.A.		
1	Course type		Contact time	Self-study		teaching methods)	Planned group size	Language		
	Internship		-	225 h						

Students are able to apply the theoretical knowledge acquired in the course of their studies to practical, project-oriented problems or issues.

In addition, they are able to analyse and assess specific problems from a business point of view and in accordance with the scientific working method, and to derive recommendations for action in which, in addition to business management aspects, ethical and social issues are also taken into account.

They are also able to document and present the procedure and results of their task in accordance with the technique of scientific work in the form of a term paper.

Finally, they are able to argue their opinion in the form of discussions with their in-company supervisor or other people.

3 Contents

In the so-called "long" work-related module, students have to work on specific projects/tasks in a business context. Individual problems should be examined and resolved holistically.

The procedure and results of the project/task are documented and graded according to the rules of the technique of scientific work.

The topics to be dealt with must be business-related and based on the module content of the curriculum.

The subject is approved by academic teachers at the suggestion of the student. The professor guides the students with the support of the in-company supervisor and oversees the course.

The internship includes the following central elements:

- a) Internship and preparatory conversation with the in-company supervisor
- b) Internship and preparatory conversations with the supervising professor
- Topic definition (based on proposals determined in preliminary discussions) by the supervising professor
- b) Accompaniment of the internship by the in-company supervisor and the professor
- d) Preparation of a term paper by students
- e) Final meeting with the in-company supervisor
- f) Grading and final interview with the supervising professor

4 Participation requirements

Compulsory participation after the academic term of the sixth semester

	Sem. lessons		4 SCH/60 h	90 h	Lecture	2	35	German	

After successfully participating in this module, students are able to organise and create periodspecific plans, and in particular carry out budgeting and the associated controls.

They are also able to describe indicators and carry out an indicator analysis. In addition, students are able to evaluate operational overall operational and functional area-related indicators with regard to the management of the company after data preparation.

Participants can formulate the main features of value-based controlling, carry out an environmental and company analysis, and develop a risk management system.

3 Contents

General part: planning and control, key performance indicator (KPI) and KPI analysis, data processing, reporting (information supply)

Operational part: budgeting, overall operational KPI analysis, KPI analysis in the functional areas

Strategic part: principles of value-based controlling, principles of risk management, environmental analysis, corporate analysis (PIMS (Production Information Management System), core competences, SWOT (Strengths, Weaknesses, Opportunities and Threats), etc.), strategic control, strategic performance measurement systems (BSC (Balanced Scorecard), etc.)

4 Participation requirements

Basic knowledge of internal and external accounting is recommended.

5 Form of assessment

Written examination or term paper or oral examination

6 Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (B.A.), Business Administration (work-integrated) (B.A.)

8 Module coordinator

Prof. Dr. Martin Wördenweber

Other information

Term papers can, if applicable, be written during the preceding lecture-free period. If this is the case, further information can be found in ILIAS.

	Financial Management 5							
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level

	Sem. lessons		4 SCH/60 h	90 h	Lecture, exe	,	35	German

After successfully completing this module, students are able to

- define essential goals of the financial management of a company,
- understand and evaluate the structure and process organisation of financial management in medium-sized to large companies in all sectors,
- analyse financial flows in groups and carry out detailed financial planning,
- apply concepts for optimising financial structures and developing overall solutions for financial management,
- explain essential capital market-based financial instruments to cover capital requirements, evaluate them with appropriate models, and select suitable ones,
- identify basic financial risks and outline and apply risk reduction options.
- describe and utilise instruments and framework conditions of strategic financial management concepts,
- determine, evaluate and assess financial information using suitable methods,
- implement the legal framework conditions in the financial sector and establish appropriate control mechanisms,
- recognise ethical problems, insolvency risks, fraud and conflicts of interest in the financial sector, and develop possible solutions.

3 Contents

- Principles + organisation of financial management
 - Goals
 - Processes and systems
 - Legal and ethical principles
- Financial planning
 - o Cash flows
 - Cash flow statement
 - Short-, medium- and long-term financial plans
- International financial processes
 - o International trade finance
 - Netting, cash pooling, payment factory, in-house bank
 - o Interest and currency management
 - Investment + financing strategies
 - Principles of capital markets
 - o Consolidation of bonds, shares and asset-backed securities
 - Strategies
- Working capital management
- Capital costs and capital structure
- Finance controlling

4 Participation requirements

Basic knowledge as conveyed in module 5 CFR 84 "Financing & Investments;" a basic knowledge of mathematics and statistics is also recommended.

Form of assessment

Written examination or term paper or oral examination

6	Condition for the award of credit points Module examination pass

	Sem. lessons		4 SCH/60 h	90 h	Lecture, exe case stud		35	German

After successfully completing this module, students are able to

- name and explain important terms in annual financial statement policy and analysis,
- identify accounting policy options including against the background of ethical aspects
 and classify them with regard to their importance for annual financial statements,
- name concepts and procedures in annual financial statement analysis,
- select and apply suitable concepts and procedures related to specific issues concerning analysis,
- assess annual financial statements from practice with regard to their informative value and derive recommendations for management from them.

All learning outcomes are based, amongst other things, on a familiarity with the current legal standards for accounting, generally the commercial law (HGB – Handelsgesetzbuch – German Commercial Code), and in selected cases the International Financial Reporting Standards (IFRS).

3 Contents

- Nature of annual financial statement policy
- Motives and goals of annual financial statement policy
- Tools for annual financial statement policy
- Limits of annual financial statement policy
- Preparatory measures for annual financial statements
- Traditional methods of annual financial statement analysis (key figure calculation)
- Modern methods of annual financial statement analysis

4 Participation requirements

Basic knowledge of external accounting against the background of national and international legal standards (HGB and IFRS), as conveyed in module 5 CFR 81 "External Accounting," is recommended.

5 Form of assessment

Written examination or term paper or oral examination

6 Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (B.A.), Business Administration (work-integrated) (B.A.)

8 Module coordinator

Prof. Dr. Ulrike Settnik

Seminar: Controlling/Finance/Accounting									
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	150 h	6	6th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.	
1	Course type		Contact time	Self-study	Forms of teaching (learning methods)		Planned group size	Language	
	Seminar		2 SCH/30 h	120 h	Case studies, lecture, group work		15	German	

2 Learning achievements/competences

On successful completion of the module, students have the following knowledge and skills:

- They are able to thematically classify specific project-oriented questions in the areas of controlling, finance or accounting, analyse and process them with the support of suitable instruments, and derive specific recommendations for a company from them.
- They are able to work on case studies, apply theoretical knowledge to complex issues, critically evaluate given recommendations for action, and form an objective opinion on the case study context.
- They are able to obtain, analyse and critically interpret materials and information from current specialist literature.
- They are able to independently summarise a completed subject area from controlling, finance or accounting in the form of a short academic paper.
- They are able to display outcomes while taking into account the required presentation techniques in front of a large group, and enter into a dialogue with it.

3 Contents

The content of this course is determined by the relevant lecturer and can be based on, in particular, current developments and issues. The following currently relevant topics can be treated as examples:

- Normative management
- Strategic controlling
- Risk management
- Operational controlling in the functional areas
- Controlling in selected industries/sectors
- Information management
- New accounting regulations at national and international level
- International cost accounting approaches
- Interdisciplinary aspects (e.g. business psychological approaches)
- Controlling, finance and accounting in medium-sized companies
- European and international financial policy
- Specific financial products and capital market analyses
- IT systems in controlling, treasury and accounting

4 Participation requirements

Basic knowledge of controlling or finance and accounting is recommended.

5 Form of assessment

Written presentation or a combination of term paper and oral presentation

6 Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (B.A.), Business Administration (work-integrated) (B.A.)

Module coordinator

Prof. Dr. Anita Eusterbrock

9 Other information

It may be possible to work on the term paper during the preceding lecture-free period. In this case, further information on the process and the allocation of topics can be found in advance in ILIAS.

	Buyer Behaviour and Marketing Research								
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	150 h	6	5th or 6th or 7th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.	
1	Course type		Contact time	Self-study	_		Planned group size	Language	
	Sem. lessons		4 SCH/60 h	90 h	Lecture, case exercises, gro	,	35	German	

On successful completion of the module, students have the following knowledge and skills:

Buver behaviour

- They know the essential parts of the brain, their functions and the sensory system and can derive and understand the context and significance for buyer behaviour.
- They are able to determine the intrapersonal determinants of buyer behaviour (e.g. activation, motives, attitudes, satisfaction, perception, learning) and the interpersonal determinants (e.g. affinity groups, influencers) and can derive, analyse and evaluate the relevance of these determinants to explain the triggered buyer behaviour.
- They are able to derive, analyse and further develop the implications of the explanatory approaches of buyer behaviour for the design of marketing stimuli.
- They are able to analyse and evaluate buyer behaviour in organisations based on specific aspects of industrial purchasing decisions and the buying centre approach.

Marketing research

- They are familiar with the measurement levels and their properties as well as the quality criteria for assessing measured data. They are familiar with essential scaling procedures and can analyse and critically reflect on these and their fields of application.
- They are able to measure the relevant psychological reactions (e.g. activation, motives, attitudes, satisfaction, etc.) and can apply, analyse and assess these in the context of market research.
- They are able to present selection procedures, as well as the surveying, observation and experimenting methods as well as special forms (e.g. panel, neuroscientific methods), and analyse and evaluate these for research into marketing issues.
- They are able to apply selected methods of uni-, bi- and multivariate data analysis and analyse and evaluate results of marketing research.

3 Contents

Buver behaviour

- The discovery, use and rationale of buyer behaviour research
- Essential neuroanatomical structures and their significance for buyer behaviour
- Importance of the sensory system for buyer behaviour
- Intrapersonal determinants of buyer behaviour
- Interpersonal determinants
- Purchasing behaviour of companies
- Selected implications of the insights for marketing

Marketing research

- Marketing research as a make-or-buy decision
- Measurement and scaling
- Measurement approaches of intrapersonal determinants
- Non-random and random selection procedures
- Methods of information acquisition (secondary research, survey, observation, experiment, special methods)
- Information evaluation (uni-, bi-, multivariate evaluation methods)

4 Participation requirements

A basic knowledge of marketing is recommended.

Form of assessment

	Written examination or oral examination
6	Condition for the award of credit points Module examination pass
7	Application of the module (in the following study programmes): Business Administration (B.A.), Business Information Systems (B.Sc.), Business Administration (work-integrated) (B.A.)
8	Module coordinator Prof. Dr. Kerstin Stender-Monhemius

В	Brand and Communication Management / Channel Management and Pricing							
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level
	150 h	6	5th or 6th or 7th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.
1	Course	Course type Contact Self- Forms of teaching time study (learning methods)			Planned group size	Language		
	Sem. lessons		4 SCH/60 h	90 h	Lecture, cas exercises, g		35	German

In terms of brand and communication management, students are able to

- classify the terms and concepts of brand policy within the product policy context
- create brand and communication policy concepts with objectives, strategies and measures, analyse existing concepts and critically examine them
- derive brand, product and communication policy objectives, classify them in the target system and operationalise them
- present, analyse and evaluate strategic and operational programme planning options, brand strategies and methods for product variation, differentiation, elimination
- present, analyse and evaluate the importance of innovation management for companies as well as the phase-specific content of the innovation management process
- derive, analyse, evaluate positioning and communication strategies
- explain, analyse and evaluate the concepts of communication policy instruments
- present, analyse and evaluate the concepts and methods for determining, distributing the communication budget and designing communicative messages
- derive and analyse key performance indicators for controlling brand, innovation and communication management.

Channel management, e-commerce and pricing:

- They know the basics of e-commerce and can present and analyse the essential business models. They are able to assess the importance of e-commerce, know the current framework conditions, developments and special features. They are able to explain relevant market forms and players.
- They are able to explain key concepts of multi-channel sales, such as the systematisation
 of sales channel alternatives and cross- and omni-channel management. They are able to
 select problem- and case-based sales channels and assess the opportunities and risks of
 multi-channel sales.
- They are able to present and analyse key aspects of customer experience management, such as transaction process design, usability or user experience.
- They are able to explain and interpret key metrics for measuring success and optimising e-commerce. They are able to classify them into the corporate and marketing target system.
- They are able to explain and analyse key pricing strategies. They are able to relate them to the overall marketing and business strategy.
- They are able to present central pricing approaches and apply them to concrete case studies. These include, for example, behavioural and dynamic pricing.

3 Contents

Brand and communication management

- Objectives, strategies and instruments of product and brand policy
- Objectives, strategies and instruments of communication policy
- Determination and distribution of the communication budget; design of the communication message
- Key figures for controlling brand, innovation and communication management

Multi-channel management, e-commerce and pricing

- Basic e-commerce models
- Omni-, cross- and multi-channel management
- Customer experience management
- Controlling and conversion measurement
- Pricing strategies
- Selected pricing approaches

4 Participation requirements

A basic knowledge of marketing recommended.

5 Form of assessment

Written examination or oral examination or a combination of written examination and oral presentation

Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (B.A.), Business Psychology (B.Sc.), Business Administration (work-integrated) (B.A.), Business Information Systems (B.Sc.)

Module coordinator

Prof. Dr. Kerstin Stender-Monhemius

Digital and social media marketing

- They are familiar with the essential framework conditions, developments and
 particularities of the digital marketing environment and their influence on buyer
 behaviour. They are able to explain and apply key concepts and tools for analysis, such
 as buyer personas and customer journeys. They are able to determine the role and
 importance of key players in the online market environment.
- They are able to integrate digital marketing objectives into the business and marketing target system. They are able to analyse, evaluate and develop digital marketing strategies.
- They are able to classify and explain key digital marketing tools in the marketing mix and make choices appropriate for the strategy. This includes, e.g., the digitalisation of products and services, search engine marketing, affiliate marketing or online advertising.
- They are able to present and explain the basics of social media marketing. They are familiar with current developments and essential forms of social media. They are able to assess the current challenges and the advantages and disadvantages of social media marketing. They are able to explain key social media marketing tools and make casebased selections.
- They are able to describe and analyse key concepts of customer retention through social media. They are also able to explain the key instruments and apply them to specific cases.

Strategic marketing and sustainability

- They know the basics of the concept of strategy and are able to classify it in the context of marketing and sustainability.
- They know the tools and models of strategic analysis as well as sustainability and can transfer them to operational practice.
- Based on the results of the analysis and forecasting phase, they can design strategic marketing objectives and classify them into the target system of the company.
- They are able to develop and locate sustainability goals in the company's target system.
- At company and business unit level, they know strategy concepts and can develop and evaluate them with regard to customers, competitors, stakeholders.
- Elements of sustainability and stakeholder orientation are taken into account in the development of marketing strategies.
- They are able to develop a sustainable marketing and business concept based on the Business Model Canvas.

3 Contents

Digital and social media marketing

- Digital marketing environment and buyer behaviour
- Conception of digital marketing
- Digital marketing tools
- Social media marketing
- Social media customer relationship management

Strategic marketing and sustainability

- Basics and definitions of strategic marketing and sustainability marketing
- Strategic situation analysis and forecasting
- Corporate, marketing and sustainability goals
- Formation of strategic business units (SBU) and market coverage strategies
- Strategy development and sustainability management in marketing
- Sustainable Business Model Canvas

4 Participation requirements

A basic knowledge of marketing recommended.

5 Form of assessment

Written examination or oral examination or a combination of written examination and oral presentation

6 Condition for the award of credit points

Module examination pass

	Seminar in Marketing								
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	150 h	6	6th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.	
1	Course type		Contact time	Self-study	Forms of teaching (learning methods)		Planned group size	Language	
	Seminar		2 SCH/30 h	120 h	Exercise, presentation, sem. lessons		15	German	

On successful completion of the module, students have the following knowledge and skills:

- They are able to independently analyse and assess problems in the context of marketing.
- They are able to transfer acquired knowledge of marketing to specific practical cases.
- They are able to identify, apply and evaluate suitable analysis methods.
- They are able to prepare solution concepts in scientific form.
- They are able to prepare their solution concepts in the form of a lecture.
- They are able to obtain and understand materials and information on topics from current specialist literature and practice.
- They are able to classify researched information in the context of the course and present it to fellow students.

3 Contents

Scientific work is to be learned and practiced as part of the seminar. The seminar may include, amongst other things, the carrying-out of literature research and smaller empirical studies, as well as the development of recommendations for action for companies. Specific tasks arise, for example, from the following marketing areas:

- Buyer behaviour of consumers and organisations
- Customer orientation, customer satisfaction and customer loyalty
- Situational analysis tools
- Marketing conceptions
- Digital marketing
- Ecological marketing; sustainability
- Consumer goods, service, capital goods, trade marketing
- Marketing for non-profit organisations
- Product policy; brand and innovation management
- Price management
- Omni-channel management, e-commerce; online trade
- Distribution management
- Communication management; digital communication; social media management

4 Participation requirements

Sound knowledge of marketing, as well as successful passing of at least two modules specialising in marketing are expressly recommended.

5 Form of assessment

Term paper or oral presentation or oral examination or a combination of the aforementioned forms of assessment

6 Condition for the award of credit points

Module examination pass

	Sem. lessons		4 SCH/60 h	90 h	Lecture, examples, studies, exe group w	case ercises,	35	German

On successful completion of the module, students have the following knowledge and skills:

- They understand and are able to present the various fields of action in human resource management in the context of current developments and in their interactions with one another and with other business functions.
- They are able to analyse HR management tasks and select problem-oriented solutions and tools.
- They are able to evaluate suitable measures from a strategic and operational point of view and partially develop them further.
- They are able to apply what they have learned to specific case studies from operational practice and reflect on them critically.

3 Contents

- Introduction to human resource management and clarification of basic terms
- Current developments and challenges in the world of work
- Socio-political, ethical and cultural aspects of human resource management (corporate social responsibility, compliance, humanisation of work, corporate values, etc.)
- Significance and functional areas of human resource management
- Human resource goals and decisions
- Corporate and human resource policy
- Organisational design and integration of the personnel function in the organisational structure
- Individual and collective human resource planning from an operational and strategic perspective
- Human resources marketing, employer branding
- Recruitment

Upon the successful completion of the module, students have basic knowledge of German individual employment law necessary for human resources work in a company; this, including the related knowledge of collective labor law. They, consequently, have the following knowledge and skills:

- Students are able to provide legal support for the application and recruitment process, paying particular attention to the legal requirements of the AGG (Allgemeines Gleichbehandlungsgesetz – Anti Discrimination Act).
- They are able to identify and assess important rights of employees and employers in the employment relationship and develop their own solutions.
- They are able to discuss the principles of employee and employer liability in the employment relationship.
- They are able to examine fixed-term employment contracts for their effectiveness and justify the legal consequences of their outcomes.
- They are able to assess the chances of success of a due/extraordinary termination and carry out the legally relevant measures when the employment relationship is terminated (e.g. works council hearings).

3 Contents

- Principles of individual employment law, e.g.:
 - Initiation and establishment of the employment relationship
 - Rights and obligations in and deriving from the employment relationship
 - Employee and employer liability
 - Termination of the employment relationship (fixed-term, notice, termination agreement)
 - Employment relationships with special groups of people
- Selected aspects of collective employment law, e.g.:
 - Duties and rights of the works council with regard to recruitment and termination
 - Significance of company agreements and collective agreements

4 Participation requirements

Successful completion of module 5 RE 81 "Economic Private Law" is recommended.

5 Form of assessment

Written examination or oral examination

6 Condition for the award of credit points

Successful passing of the module examination

7 Application of the module (in the following study programmes):

Business Administration (B.A.), Business Psychology (B.Sc.), Business Administration (work-integrated) (B.A.)

			Princ	iples of Logi	stics			Module ID 5 P/L 38
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level
	150 h	6	5th or 6th or 7th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.
1	Course	type	Contact time	Self-study	Forms of tea (learning me	_	Planned group size	Language
	Sem. le	essons	4 SCH/60 h	90 h	Lecture, exe group work studies	, case	35	German

On successful completion of the module, students have the following knowledge and skills:

- They are able to understand logistical processes both inside and outside the company and to show the importance of logistics as a cross-sectional task.
- They are able to explain the basic terms and concepts of logistics and supply chain management and distinguish them from one another.
- They are able to apply the concepts and methods discussed in the lecture and transfer them to operational use cases.
- They are able to compare essential logistics concepts in procurement, production, distribution and disposal and assess which approaches and instruments are best suited to the situation. Environmental aspects may also be assessed.
- They are able to develop their own solution proposals based on the selection of suitable methods and concepts for specific problems or applications.

3 Contents

In view of the global networking of companies and markets, the design and coordination of spatio-temporal transformation processes are becoming increasingly important. Today, logistics is seen as a cross-sectional function that is required in all phases of the goods economy transformation process. The task of logistics is to coordinate the material and information flows associated with the exchange of services, which are used to link internal and external stages in the value chain. On the one hand, the areas of procurement logistics, production logistics, distribution logistics and disposal logistics are dealt with in accordance with the value chain and based on the goals and tasks of logistics. On the other hand, there is an integrated consideration of company-wide value creation activities within the framework of supply chain management. In this, the basic interrelationships are shown and application-related, selected conceptual and quantitative models are deployed as solution methods for strategic and operational logistics tasks. The contents of the lecture are consolidated and discussed on the basis of exercises.

4 Participation requirements

A basic knowledge of production and logistics is recommended.

Form of assessment

Written examination or oral examination

6 Condition for the award of credit points

Module examination pass

7 **Application of the module** (in the following study programmes):

Business Administration (B.A.), Business Administration (work-integrated) (B.A.)

Module coordinator

Prof. Dr. Gerald Oeser

9 Other information

References and learning materials will be made available during the course.

			Log	gistics Syste	ms			Module ID 5 P/L 31
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level
	150 h	6	5th or 6th or 7th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.

	Sem. lessons		4 SCH/60 h	90 h	Lecture project w	•	35	German

After successfully completing the module, students are able to describe and apply the principles of logistics systems.

Students are able to verify the learned principles using practical examples and implement them in practice-oriented projects in companies (e.g. at Miele or Gestamp).

They are then able to justify and defend the solutions they have developed in front of management.

Students have a well-founded understanding of logistical relationships, which is increased by the factory tours. After participating in the module, students are able to evaluate logistical processes. In addition to the technical and financial aspects, they are able to evaluate social, human and employment-law aspects of certain systems.

3 Contents

The tasks and functions of logistics systems are presented during the module. In addition to the seminar-based tuition, specific projects are carried out in companies. The focus of teaching depends on the relevant project situation. Results must be presented after the project work is completed.

Contents include:

- Principles of logistics systems
- Transport systems
- Warehouse systems
- Picking systems
- Packing systems
- Information systems
- Deployment of logistics systems

4 Participation requirements

A basic knowledge of production and logistics is recommended.

5 Form of assessment

Project work or oral examination or term paper

6 Condition for the award of credit points

Module examination pass

7 Application of the module (in the following study programmes):

Business Administration (B.A.), Business Information Systems (B.Sc.), Business Administration (work-integrated) (B.A.)

8 Module coordinator

Prof. Dr. Thomas Plümer

9 Other information

Project work and presentations usually take the form of group work. In addition, there is a lively exchange of information in technical discussions with the employees of the relevant company.

			Proc	duction Planr	ning			Module ID 5 P/L 34

On successful completion of the module, students have the following knowledge and skills:

- Students can independently analyse and assess problems in the field of production and logistics.
- In addition, they are able to identify and apply suitable methods and tools.
- Furthermore, students can elaborate and compare appropriate solutions for the problems mentioned and make selection decisions based on business-related criteria.
- In addition, students are able to didactically prepare, justify, and present their independently developed solution concepts.

3 Contents

Changing tasks from the field of production and logistics, depending on the semester. Examples of such assignments may include:

- Factory planning and material flow design
- Deployment of simulations in material flow
- Current deployment concepts
- Supplier structure policy
- Process optimisation of business processes in the production environment
- Production control in operational practice
- Workflow management
- Quality management systems
- Key Performance Indicators (KPI) in logistics

4 Participation requirements

On successful completion of the module, students have the following knowledge and skills:

- They are able to explain the specific legal procedures for tax collection.
- They are able to explain the content of the regulations on out-of-court redress procedures.
- They are able to apply their knowledge to tax cases by recognising problems and assigning the relevant legal consequences to the relevant facts.
- They are able to assess business issues against the background of tax honesty and analyse the consequences of tax fraud and evasion.
- They are able to assess the financial and economic necessity of taxes, which is based on compliance with tax laws.
- Optional: they are able to evaluate and assess facts in terms of VAT.
- They are able to present the VAT taxation system and evaluate simpler facts in terms of VAT.
- Optional: they are able to process IT-supported matters and implement procedural law using DATEV and other providers.

3 Contents (amongst others):

- Tax procedural law and assessment procedure
- Correction of administrative files
- Out-of-court redress procedure
- Right to be heard, prohibition of *reformatio in peius* (the court may not make a more adverse assessment than the tax authorities)
- Adjournment, suspension of proceedings
- Discussion of the factual and legal status
- Judicial appeal process
- Principles of field auditing
- Tax offences and tax misdemeanours (including tax ethics and tax honesty)
- Optional: principles of VAT taxation
- Other corporate tax systems
- Assessment of sales, their taxability and tax liability
- Knowledge of the principles of input tax deduction

4 Participation requirements

Basic knowledge of the taxation of companies, as imparted in Module 5 StU 80 "Taxation," is recommended.

5 Form of assessment

Written examination or oral examination or a combination of the aforementioned forms of assessment

6 Condition for the award of credit points

- They are able to describe the necessity of an audit of annual financial statements to promote the overall welfare, and know the aim of an annual audit (ensuring compliance with legal regulations).
- They are able to explain the professional principles behind an audit and assess compliance with them on a case-by-case basis. In particular, they are able to apply and judge the norms for conscientiousness, personal responsibility, professional conduct, independence and confidentiality. In addition, they are able to present and assess the means optional to use by the Wirtschaftsprüferkammer (Chamber of Public Accountants) for monitoring compliance with these regulations.
- They are able to explain basic terms and calculate qualitative quantities of audit theory.
- They are able to describe the theoretical procedure for carrying out a company audit.
- They are able to independently resolve practical problems concerning individual auditing areas of the financial statement under commercial law and independently by applying their knowledge.

3 Contents (amongst others):

- Institutions in the context of accounting and auditing
- Pathway to become an auditor and fields of activity (auditing of annual financial statements, auditing of consolidated financial statements, special audits)
- Aims and purposes of the audit of the annual financial statement
- Audit process sequence (e.g. order, audit planning/risk assessment, control evaluation/substantive testing, documentation/reporting)
- Components of the annual financial statement (balance sheet, income statement, notes and management report)
- Accounting and auditing of assets (cash/bank, tangible assets, inventories, receivables)
- Accounting and auditing of liabilities: including liabilities, equity, provisions
- Principles of group accounting and auditing
- Principles of business valuation

4 Participation requirements None 5 Form of assessment Written examination or oral examination 6 Condition for the award of credit points Module examination pass

7	Application of the module (in the following study programmes): Business Administration (B.A.), Business Administration (work-integrated) (B.A.)
8	Module coordinator Prof. Dr. Andreas Stute
9	Other information - where applicable, guest lectures on current issues

	Seminar: Taxation and Audit									
No.	Workload Credit Study points Semester Frequency Sem. Duration Type					Q-level				
	150 h	6	6th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.		
1	Course type		Contact time	Self-study	Forms of teaching (learning methods)		Planned group size	Language		
	Seminar		2 SCH/30 h	120 h	Lecture, grou case proce		15	German		

On successful completion of the module, students have the following knowledge and skills:

- They are able to independently analyse comprehensive issues related to taxation, accounting or auditing that are fundamentally new to them and resolve them in a structured and scientific manner.
- They are able to find literature relevant to the problem, evaluate it, and appreciate it with regard to the problem.
- They are able to present acquired knowledge according to scientific methods in the form of a written term paper.
- They are able to present and advocate their results verbally and with EDP support (sometimes in groups).

3 Contents

The contents of the seminar are essentially determined by the issues currently being discussed in the relevant discipline (tax law, accounting, corporate audit). For example, the following topics can be covered:

- Tax accounting policy, e.g. aims, instruments, impact analysis
- Corporate restructuring
- Tax optimisation concerning company formation, e.g. choice of legal form
- Tax arrangements concerning partnerships, e.g. new partners, liquidation/split up, company succession
- Tax-optimised corporate finance
- Comparisons of individual cases with regard to their assessment under commercial law or tax law or assessment under IFRS
- Theoretical questions concerning the auditing process, such as the audit of the internal control system or the early risk detection system
- Group accounting and auditing
- Business valuation
- Special audits: foundation audits, review of winding-up/liquidation, individual questions from accounting and audits under commercial law/tax law/IFRS

4 Participation requirements

None. It is recommended to take the seminar as the last of the compulsory elective modules for specialisation.

On successful completion of the module, students have the following knowledge and skills:

- They are able present the principles of international management and important institutional frameworks for international business activity.
- They are able to explain internationalisation strategies and organisational forms of international companies.
- They are able to describe the concepts and tasks of controlling, as well as the role model of the controller in different countries.
- They are able to discuss factors influencing the development and implementation of controlling, divergence and convergence processes, and their effect in the context of controlling.
- They are able to interpret the influence of national culture on controlling based on current theories.
- They are able to apply various quantitative and qualitative controlling instruments to the context of international business activity.
- They are able to identify specific problems in international companies, classify them thematically, and analyse and process them with the aid of suitable controlling instruments.
- They are able to understand and explain the interface function of controlling and the cooperation between controlling and other corporate areas in the context of international business activities.
- They are able to obtain, analyse and critically interpret materials and information from current specialist literature.

3 Contents

Principles of international business activity

- Internationalisation strategies
- International organisational structures
- International comparative controlling
- Role of the controller and tasks of controlling in different countries
- Cultural and ethical influences on controlling
- Application of various strategic controlling instruments to the international context
- Controlling exchange rate risks
- Selected problems of controlling in high-inflation countries
- Selected aspects of controlling in various functional areas
- Selected aspects of international transfer pricing
- International Information Management

4 Participation requirements

A basic knowledge of cost and performance accounting, as taught in module 5 CFR 82 "Internal Accounting," is recommended.

	International Human Resource Management									
No.	Workload	Credit points	Study semester	Frequency	Sem.	Sem. Dura- tion Type				
	150 h	6	5th or 6th or 7th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.		
1	1 Course type		Contact time	Self-study	Forms of (learning	_	Planned group size	Language		
	Sem. lessons		4 SCH/60 h	90 h	Lecture examples, group	exercises,	35	English		

On successful completion of the module, students have the following knowledge and skills:

- They are able to explain the special features of International Human Resource Management (IHRM) in contrast to the purely nationally oriented Human Resource Management (HRM).
- They are able to present the central issues of HRM in an international context.
- They can understand and describe the impact of the internationality of businesses and companies on the various fields of action of HRM.
- They are able to analyse fundamental problems of IHRM and derive target-oriented strategic and operative measures.
- They are able to apply what they have learned to specific case studies from operational practice.

3 Contents

- Introduction to and principles of IHRM
- International human resource selection and recruitment
- Cross-border deployment of human resources
- · Human resource development and performance evaluation in international companies
- Intercultural competence development
- International remuneration policy
- Organisation of international cooperation

4 Participation requirements

A basic knowledge of human resource management and company organisation, such as that taught in the module "Principles of Business Administration" (5 MG 82), is recommended. Further knowledge of personnel management, such as that taught in modules 5 P/O 81 "Leadership" and 5 P/O 32 or 5 P/O 35 "Human Resource Management 1 and 2," is also recommended.

5 Form of assessment

Written examination or oral examination or a combination of term paper and oral presentation or a combination of written examination and oral presentation or a combination of written examination and term paper

6 Condition for the award of credit points

Module examination pass

	International Logistics								
No.	Workload	Credit points	Study semester	Frequency	Sem.	Dura- tion	Туре	Q-level	
	150 h	6	5th or 6th or 7th sem.	Bi-annual	Winter/ Summer	1 sem.	Compulsory elective	B.A.	
1	Course	e type	Contact time	Self-study	Forms of t	_	Planned group size	Language	
	Sem. lessons		4 SCH/60 h	90 h	Business game, project work, group work		35	English	

On successful completion of the module, students are able to

- present the principles of production and logistics networks in a global environment,
- deal independently with questions from the field of production and logistics management under realistic conditions (time pressure, uncertainty and changing economic framework conditions),
- draw up, assess and present alternative courses of action based on company and environmental analyses, taking into account the interdependencies between the functional and design areas of an internationally operating company,
- select the methods and work techniques customary in production, logistics and general business administration and use them on a case-by-case basis,
- formulate strategic goals and take them into account or adjust them in the context of repeated operational decisions,
- recognise interactions between internal and external influences and take them into account in the planning and decision-making process,
- organise themselves in a team while taking project management into account and log the outcomes of planning and decision-making,
- present and defend project outcomes in a professional manner to other team members and outsiders.

3 Contents

Operational planning, decisions & control in procurement, production and distribution:

- Raw material procurement (supplier, quantity, just in time (JIT), warehouse, incoming inspection)
- Transport (warehouse, wholesaler, end-customer)
- Human resource decisions (recruitment, redundancy, training)
- Prices (major customers, end-customer differentiation)
- Haulier vs. transport company (comparison of quotes, delivery priorities)
- Sales (price, customer service)

Strategic planning, decisions & control in procurement, production and distribution:

- Basic orientation (make or buy (MoB), e-commerce, internal process optimisation, suppliers, order quantities, delivery cycle)
- Establishment of regional warehouses (construction, purchase, cooperation)
- Strategic alliance (cooperation with suppliers of merchandise)
- Logistics service provider (short- or long-term commitment)

4 Participation requirements

A basic knowledge of production and logistics is recommended.

5 Form of assessment

Written examination or oral examination or project work or oral presentation or written presentation or a combination of several of the aforementioned forms of assessment

6	Condition for the award of credit points Module examination pass
7	Application of the module (in the following study programmes): Business Administration (B.A.), Business Administration (work-integrated) (B.A.)
8	Module coordinator Prof. Dr. Gerald Oeser

			4 SCH/60 h	90 h	Lecture, group work, case processing		35	English	

On successful completion of the module, students have the following knowledge and skills:

- They are able to explain basic terms in connection with the taxation of natural persons, corporations and partnerships.
- They are able to describe the procedure for determining the tax burden of income, corporation and trade tax.
- They are able to explain the legal tax consequences associated with different legal forms.
- They are able to apply their knowledge to tax cases by recognising problems and assigning the relevant legal consequences to the relevant facts.
- They are able to explain the issue of double taxation and measures to mitigate it.
- They are able to evaluate tax regulations.

3 Contents (amongst others):

- Income taxes for companies: income tax, corporation tax, business tax
- Taxation of companies operating at national level with regard to different legal forms
- Tax arrangements (e.g. tax group, transfer of company assets, restructuring)
- Tax justice in an international context
- Principles of international corporate taxation, such as double and under-taxation, unilateral measures against double and under-taxation, double taxation agreements and European law
- Taxation of foreign investors in Germany (inbound investments)
- Taxation of foreign activities by domestic investors (outbound investments)
- International profit limitation (e.g. transfer prices, determination of operating success)
- Ethical issues of cross-border tax minimisation efforts

	Seminar		2 SCH/30 h	120 h	Lecture, grou project work		15	German/ English		

On successful completion of the module, students have the following knowledge and skills:

- They are able to explain the Lean Startup method.
- They are able to apply the Lean Startup method to open up a new business area.
- They are able to assess what it means to start a company or to initiate one's own project in an existing company.
- They are able to describe real company processes, develop approaches to solving problems in a team, contribute their own ideas and present solutions to company representatives.

3 Contents

How can existing companies behave in an entrepreneurial way? How can new growth areas be occupied? How can start-ups' success concepts be applied in large companies?

In the "Corporate Entrepreneurship" module, the participants, in cooperation with employees from existing companies, find out answers to these questions by developing their own project idea in the context of a company.

First, the relevant branch of the cooperating company is presented and introduced to the Lean Startup method. The teams then develop a project idea and the corresponding solution so that they can present it at the end.

The overall goal is to impart knowledge and skills in terms of identifying business opportunities as well as to develop and implement own business ideas independently.

After successful completion of the module, students are able to:

- Understand and apply relevant content and methods of a business plan,
- Analyse opportunities, risks, market potential and competitive situations,
- · Create new business models, brands and market entry strategies,
- Deal with uncertainty and information overload and evaluate entrepreneurial decisions, as well as
- Work together to develop and adequately present entrepreneurial concepts within the framework of group tasks.

3 Contents

The project work corresponds to the preparation of a business plan for a fictitious or real founding idea. The process includes:

- Identification of a business idea
- Development of a business model
- Application of design thinking & prototyping, if applicable
- Preparation of the business plan based on the requirements of the EXIST start-up scholarship (incl. analysis of the competitive situation and financial planning)

The module starts with a compact course that imparts the theoretical foundations. The assessment consists of a business plan and one or more (oral) presentations in which the founding idea and the final business plan are to be presented.

The business plan is based on the requirements of the EXIST Start-Up Scholarship. The fictitious or real business ideas are developed and presented during the semester in small groups (2–4 students).

The overarching goal is to impart knowledge and skills with regard to entrepreneurial activities. This basic course presents the foundation of a company as an attractive career choice and promotes awareness of the topic.

After successful completion of the module, students are able to:

- Understand business contexts, and consider entrepreneurship as a career in particular,
- Apply specific entrepreneurship methods and tools such as Business Model Canvas and analyse markets and competitive situations in particular,
- Evaluate entrepreneurial decisions and gain and assess (market) information, as well as
- Develop an individual attitude towards an entrepreneurial activity and adequately assess the probability of success of one's own founding idea in particular.

3 **Contents**

How do you develop a business idea? What makes for a successful start-up?

In the "Entrepreneurship" module, participants examine the following issues regarding the creation of a business:

- Entrepreneurship as a career choice,
- Recognising business opportunities,
- Developing business ideas and business models,
- Structure and content of business plans,
- Competitive analysis,
- Founding team composition, as well as
- Start-up financing.

First, basic knowledge is imparted and supplemented by case studies, which the students present to each other. The acquired knowledge will be tested in a written examination.
